

RESTORATION

During the last decade Woodstone has established relationships with several Historic Landmark Organizations. Some of the most prominent include the New York Landmark Conservancy which oversees one of this country's largest historic districts, The Preservation League of New York State and the New York City Historical Property Fund, Inc. Woodstone is currently listed in the Directory of County and Municipal Historians of New York, The Old House Journal Catalog as well as being a member of the National Trust For Historic Preservation.

For projects requiring duplicate detailing or consistent glass & panel sizes that must match specific vertical and/or horizontal benchmarks, Woodstone's CAD CAM system is essential. All component parts of any window or door are adjustable to the closest 1/64" increment.

Double Hung window REPLACEMENT PACKS, including replacement sash & balances or weights & pulleys, are available for units in which jambs and trim need not be replaced. Consider replacing old single glazed energy wasting sash with efficient insulating glass while maintaining the original appearance of the window.

SPECIFICATIONS & DRAWINGS:

Woodstone's specification document (PROSPEC) is the primary source listing of all materials & details included with our proposal. PROSPEC refers to all specific details and elevations. Because Woodstone's product is unique, we provide directions on "How to Read and Understand Your Proposal Specifications" along with a "Glossary of Terms". See Chapter 3 for more information on PROSPEC.

Section drawings demonstrating sill, jamb & head details for any of our products are provided upon request. Elevation drawings, including specific dimensions, for sash & door muntins & frames, hardware, insulating and single glass as well as custom trim packages are also available.

While most preliminary specifications and details are provided by Woodstone free of charge, design detailing specific to a given project may include a service charge. Often, charges for design and drawing services are credited toward the project costs when you choose Woodstone as your supplier.

Using Woodstone's 24 Hour FAX service, most drawings can be produced and transmitted within several working days.

Door and Window costs are primarily based upon overall product size, material and the number of multiple lites/panels. There are no additional charges for odd or fractionally dimensioned sizes.
